Subject Index

0100 Costs

0103 Cost Estimating

Production Lot-Sizing Under Learning Effects: An Efficient Solution Technique; Klastorin, T. D. and Kamran Moinzadeh; March; p. 2.

Optimal Control of a Linear Trend Process with Quadratic Loss; Drezner, Z. and G. O. Wesolowsky; March; p. 66.

Component Inventory Costs in an Assembly Problem with Uncertain Supplier Lead-Times; Kumar, Anurag; June; p. 112.

The Uncapacitated Facility Location Problem with Primary and Secondary Facility Requirements; Pirkul, Hasan; December; p. 337.

A Production and Maintenance Planning Model with Restoration Cost Dependent on Detection Delay; Lee, Hau L. and Meir J. Rosenblatt; December; p. 368.

0104 Cost Reduction Programs

Servicing, Quality Design and Control; Ritchken, Peter H., Jagadeesh Chandramohan and Charles S. Tapiero; September; p. 213.

Duplication Process in Machine Cells Formation in Group Technology; Seifoddini, Hamid; December; p. 382.

0300 Engineering Economics

0303 Investment Analysis

Multiple Attribute Decision Analysis with Imprecise Information; Yoon, Kwangsun and Gyutai Kim; March; p. 21.

0400 Facilities Planning, Design

0402 Facility Location

A Bewitched Fermat-Problem; Berens, Wolfgang; March; p. 73.

Tree Network Location Problems with Minimum Separations; Moon, I. Douglas and Alan J. Goldman; September; p. 230.

The Uncapacitated Facility Location Problem with Primary and Secondary Facility Requirements; Pirkul, Hasan; December; p. 337.

0404 Plant Design, Construction

Utilizing Cut Trees as Design Skeletons for Facility Layout; Montreuil, Benoit and H. Donald Ratliff; June; p. 136.

0405 Plant Layout Analysis

Utilizing Cut Trees as Design Skeletons for Facility Layout; Montreuil, Benoit and H. Donald Ratliff; June; p. 136.

0600 Human Engineering

0603 Ergonomics

The Impact of Breaks on Forgetting When Performing a Repetitive Task; Globerson, Shlomo, Nissan Levin and Avraham Shtub; December; p. 376.

0604 Learning

Production Lot-Sizing Under Learning Effects: An Efficient Solution Technique; Klastorin, T. D. and Kamran Moinzadeh; March; p. 2.

The Impact of Breaks on Forgetting When Performing a Repetitive Task; Globerson, Shlomo, Nissan Levin and Avraham Shtub; December; p. 376.

0900 Industries

0904 Manufacturing

An Analytical Approach to Competitive Strategy Formulation in Mature Industries; Oral, Muhittin and C. Rene Dominique; September; p. 271.

1000 Management

1003 Decision Making

Multiple Attribute Decision Analysis with Imprecise Information; Yoon, Kwangsun and Gyutai Kim; March; p. 21.

1005 Management Development

An Analytical Approach to Competitive Strategy Formulation in Mature Industries; Oral, Muhittin and C. Rene Dominique; September; p. 271.

1100 Material Handling

1101 Containers, Unit Loads

Purchasing Policy of New Containers Considering the Random Returns of Previously Issued Containers; Kelle, Peter and Edward A. Silver; December; p. 349.

1105 Dispatching, Scheduling

Decentralized Control of Automated Guided Vehicles on a Simple Loop; Bartholdi, III, John J. and Loren K. Platzman; March; p. 77.

Control of Material Handling Transporter in Automated Manufacturing; Han, Min-Hong and Leon F. McGinnis; June; p. 184.

1200 Methods Engineering

1205 Manufacturing Engineering

Productivity Modeling of Group Machine Loading with Variable Processing Times; Sumanth, David J. and Manuel A. Carrillo; March; p. 27.

Single Run Optimization of Discrete Event Simulations—An Empirical Study Using the M/M/1 Queue; Suri, Rajan and Ying Tat Leung; March; p. 35.

Optimal Control of a Linear Trend Process with Quadratic Loss; Drezner, Z. and G. O. Wesolowsky; March; p. 66.

Bounds for Throughput in Production/Inventory Systems in Series with Deterministic Processing Times; Altiok, Tayfur and Zuling Kao; March; p. 82.

Determination of Optimal Buffer Storage Capacities and Optimal Allocation in Multistage Automatic Transfer Lines; Jafari, Mohsen A. and J. George Shanthikumar; June; p. 130.

An Artificial Intelligence Approach to the Scheduling of Flexible Manufacturing Systems; Shaw, Michael J. and Andrew B. Whinston; June; p. 170.

Machining Parameter Selection for a Stochastic Flow System; Chan, Wenyaw, Anlong Li and Henry C. Co; September; p. 241.

A Review of the Dual Resource Constrained System Research; Treleven, Mark; September; p. 279.

FMS Implementation Procedure: A Case Study; Fry, Timothy D. and Allen E. Smith; September; p. 288.

Duplication Process in Machine Cells Formation in Group Technology; Seifoddini, Hamid; December; p. 382.

1209 Process Design

FMS Implementation Procedure: A Case Study; Fry, Timothy D. and Allen E. Smith; September; p. 288.

1210 Research

Research Needs and Challenges in Application of Computer and Information Sciences for Industrial Engineering; Nof, Shimon Y., E. E. Elmaghraby, Gavriel Salvendy, Deborah J. Seifert, Tibor Vamos, John A. White, Hans-Jorg Bullinger, A. Alan B. Pritsker, A. W. Scheer, Daniel Teichroew, A. B. Whinston, and Gary E. Whitehouse; March; p. 50.

1300 Quantitative Methods

1301 Mathematical Models

Production Lot-Sizing Under Learning Effects: An Efficient Solution Technique; Klastorin, T. D. and Kamran Moinzadeh; March; p. 2.

When Is The Economic Lot Scheduling Problem Easy?; Jones, Philip C. and Robert R. Inman; March; p. 11.

Multiple Attribute Decision Analysis with Imprecise Information; Yoon, Kwangsun and Gyutai Kim; March; p. 21.

Productivity Modeling of Group Machine Loading with Variable Processing Times; Sumanth, David J. and Manuel A. Carrillo; March; p. 27.

Single Run Optimization of Discrete Event Simulations—An Empirical Study Using the M/M/1 Queue; Suri, Rajan and Ying Tat Leung; March; p. 35.

Optimal Control of a Linear Trend Process with Quadratic Loss; Drezner, Z. and G. O. Wesolosky; March; p. 66.

Bounds for Throughput in Production/Inventory Systems in Series with Deterministic Processing Times; Altiok, Tayfur and Zuling Kao; March; p. 82.

A Three Phased Approach to Final Exam Scheduling; Arani, Taghi and Vahid Lotfi; March; p. 86.

Balancing Cycle Time and Workstations; Deckro, Richard F.; June; p. 106.

Component Inventory Costs in an Assembly Problem with Uncertain Supplier Lead-Times; Kumar, Anurag; June; p. 112.

Approximate Analysis for the Merge Configuration of an Open Queueing Network with Blocking; Lee, Hyo-Seong and Stephen M. Pollock; June; p. 122.

Determination of Optimal Buffer Storage Capacities and Optimal Allocation in Multistage Automatic Transfer Lines; Jafari, Mohsen A. and J. George Shanthikumar; June; p. 130.

Economic Lot Scheduling for Two-Product Problem; Lee, Chung-Yee and Surya Danusaputro; June; p. 162.

Control of Material Handling Transporter in Automated Manufacturing; Han, Min-Hong and Leon F. McGinnis; June; p. 184.

Optimal Provisioning for Single-Echelon Repairable Item Inventory Control in a Time-Varying Environment; Balana, Arturo R., Donald Gross and Richard M. Soland; September; p. 202.

Servicing, Quality Design and Control; Ritchken, Peter H., Jagadeesh Chandramohan and Charles S. Tapiero; September; p. 213.

Machining Parameter Selection for a Stochastic Flow System; Chan, Wenyaw, Anlong Li and Henry C. Co; September; p. 241.

Effects of Pooling on the Optimization and Service Levels of Two-Location Inventory Systems; Tagaras, George; September; p. 250.

A Solution to the Multiple Set-Up Problem with Dynamic Demand; Lee, Chung-Yee; September; p. 266.

Purchasing Policy of New Containers Considering the Random Returns of Previously Issued Containers; Kelle, Peter and Edward A. Silver; December; p. 349.

Optimal Cycle Times in a Two-Stage Serial System with Set-up and Inventory Costs; Karimi, Iftekhar A.; December; p. 324.

1302 Networks

Utilizing Cut Trees as Design Skeletons for Facility Layout; Montreuil, Benoit and H. Donald Ratliff; June; p. 136.

Tree Network Location Problems with Minimum Separations; Moon, I. Douglas and Alan J. Goldman; September; p. 230.

1303 Programming: Linear, Nonlinear

Balancing Cycle Time and Workstations; Deckro, Richard F.; June; p. 106.

Efficient Solutions to a Linear Programming Model for Production Scheduling With Capacity Constraints and No Initial Stock; McClain, John O., L. Joseph Thomas and Elliott N. Weiss; June; p. 144.

Computing Optimal Server-Vacation Policies; Harris, Carl M. and William G. Marchal; September; p. 258.

An Analytical Approach to Competitive Strategy Formulation in Mature Industries; Oral, Muhittin and C. Rene Dominique; September; p. 271.

The Uncapacitated Facility Location Problem with Primary and Secondary Facility Requirements; Pirkul, Hasan; December; p. 337.

1305 Simulation/Games

Single Run Optimization of Discrete Event Simulations—An Empirical Study Using the M/M/1 Queue; Suri, Rajan and Ying Tat Leung; March; p. 35.

Due Date Assignment in a Multistage Job Shop; Fry, Timothy D., Patrick R. Philipoom and Robert E. Markland; June; p. 153.

Random Initialization Methods in Simulation; Kelton, W. David; December; p. 355.

1306 Applied Probability

Assessing Process Capability: A Bayesian Approach; Cheng, Smiley W. and Frederick A. Spiring; March; p. 97.

Approximate Analysis for the Merge Configuration of an Open Queueing Network with Blocking; Lee, Hyo-Seong and Stephen M. Pollock; June; p. 122.

Optimal Provisioning for Single-Echelon Repairable Item Inventory Control in a Time-Varying Environment; Balana, Arturo R., Donald Gross and Richard M. Soland; September; p. 202.

Computing Optimal Server-Vacation Policies; Harris, Carl M. and William G. Marchal; September; p. 258.

Estimation of Inventory Re-Order Levels Using the Bootstrap Statistical Procedure; Bookbinder, James H. and Anne E. Lordahl; December; p. 302.

The Economic Design of a Dynamic $\bar{X}$-Control Chart; Parkhideh, Behrooz and Kenneth E. Case; December; p. 313.

A Two-Sided Screening Procedure Using Several Correlated Variables; Tang, Jen and Kwei Tang; December; p. 333.

Random Initialization Methods in Simulation; Kelton, W. David; December; p. 355.

1400 Production and Inventory Control

1402 Forecasting

A Decision Support System for Determining Optimal Retention Stocks for Service Parts Inventories; Hill, Arthur V., Vincent Giard and Vincent A. Mabert; September; p. 221.

A Note on the Sensitivity of the EOQ; Higle, Julia L.; September; p. 294.

1403 Inventory Control

Production Lot-Sizing Under Learning Effects: An Efficient Solution Technique; Klastorin, T. D. and Kamran Moinzadeh; March; p. 2.

When Is The Economic Lot Scheduling Problem Easy?; Jones, Philip C. and Robert R. Inman; March; p. 11.

Bounds for Throughput in Production/Inventory Systems in Series with Deterministic Processing Times; Altiok, Tayfur and Zuling Kao; March; p. 82.

Component Inventory Costs in an Assembly Problem with Uncertain Supplier Lead-Times; Kumar, Anurag; June; p. 112.

Optimal Provisioning for Single-Echelon Repairable Item Inventory Control in a Time-Varying Environment; Balana, Arturo R., Donald Gross and Richard M. Soland; September; p. 202.

A Decision Support System for Determining Optimal Reten-

tion Stocks for Service Parts Inventories; Hill, Arthur V., Vincent Giard and Vincent A. Mabert; September; p. 221.
Effects of Pooling on the Optimization and Service Levels of Two-Location Inventory Systems; Tagaras, George; September; p. 250.
A Note on the Sensitivity of the EOQ; Higle, Julia L.; September; p. 294.
Purchasing Policy of New Containers Considering the Random Returns of Previously Issued Containers; Kelle, Peter and Edward A. Silver; December; p. 349.
Estimation of Inventory Re-Order Levels Using the Bootstrap Statistical Procedure; Bookbinder, James H. and Anne E. Lordahl; December; p. 302.
Optimal Cycle Times in a Two-Stage Serial System with Set-up and Inventory Costs; Karimi, Iftekhar A.; December; p. 324.

1405 Production Control
Bounds for Throughput in Production/Inventory Systems in Series with Deterministic Processing Times; Altiok, Tayfur and Zuling Kao; March; p. 82.
Due Date Assignment in a Multistage Job Shop; Fry, Timothy D., Patrick R. Philipoom and Robert E. Markland; June; p. 153.
A Review of the Dual Resource Constrained System Research; Treleven, Mark; September; p. 279.

1406 Production Planning
Production Lot-Sizing Under Learning Effects: An Efficient Solution Technique; Klastorin, T. D. and Kamran Moinzadeh; March; p. 2.
A Solution to the Multiple Set-Up Problem with Dynamic Demand; Lee, Chung-Yee; September; p. 266.
A Note on the Sensitivity of the EOQ; Higle, Julia L.; September; p. 294.
Optimal Cycle Times in a Two-Stage Serial System with Set-up and Inventory Costs; Karimi, Iftekhar A.; December; p. 324.
A Production and Maintenance Planning Model with Restoration Cost Dependent on Detection Delay; Lee, Hau L. and Meir J. Rosenblatt; December; p. 368.

1407 Production Scheduling
When Is The Economic Lot Scheduling Problem Easy?; Jones, Philip C. and Robert R. Inman; March; p. 11.
Productivity Modeling of Group Machine Loading with Variable Processing Times; Sumanth, David J. and Manuel A. Carrillo; March; p. 27.
Balancing Cycle Time and Workstations; Deckro, Richard F.; June; p. 106.
Efficient Solutions to a Linear Programming Model for Production Scheduling With Capacity Constraints and No Initial Stock; McClain, Jo n O., L. Joseph Thomas and Elliott N. Weiss; June; p. 144.
Economic Lot Scheduling for Two-Product Problem; Lee, Chung-Yee and Surya Danusaputro; June; p. 162.
An Artificial Intelligence Approach to the Scheduling of Flexible Manufacturing Systems; Shaw, Michael J. and Andrew B. Whinston; June; p. 170.
A Solution to the Multiple Set-Up Problem with Dynamic Demand; Lee, Chung-Yee; September; p. 266.
A Production and Maintenance Planning Model with Restoration Cost Dependent on Detection Delay; Lee, Hau L. and Meir J. Rosenblatt; December; p. 368.

1500 Quality Control

1501 Inspection
A Two-Sided Screening Procedure Using Several Correlated Variables; Tang, Jen and Kwei Tang; December; p. 333.
A Production and Maintenance Planning Model with Restoration Cost Dependent on Detection Delay; Lee, Hau L. and Meir J. Rosenblatt; December; p. 368.

1502 Quality Control
Assessing Process Capability: A Bayesian Approach; Cheng, Smiley W. and Frederick A. Spiring; March; p. 97.
Managing Quality; Garvin, David A.; June; p. 191.
Servicing, Quality Design and Control; Ritchken, Peter H., Jagadeesh Chandramohan and Charles S. Tapiero; September; p. 213.
The Economic Design of a Dynamic $\overline{X}$-Control Chart; Parkhideh, Behrooz and Kenneth E. Case; December; p. 313.

1504 Sampling
Servicing, Quality Design and Control; Ritchken, Peter H., Jagadeesh Chandramohan and Charles S. Tapiero; September; p. 213.

1704 Information Retrieval
An Artificial Intelligence Approach to the Scheduling of Flexible Manufacturing Systems; Shaw, Michael J. and Andrew B. Whinston; June; p. 170.
